

Wire Lock Pins

Wire lock pins are like having pin and cotter in one secure assembly. The wire loop is pulled over the pin end to lock it in place or remove it. This one piece fastener eliminates cotter pin loss and fits most quick release applications.

Made of low carbon steel, zinc plated. Wire loop of hard drawn MB spring wire.

Keep your pin in place with Nylon Lanyards

Tab Lock Pins

Even easier to use than standard wire lock pins. Pull up on tab to remove, push down on wire loop to lock. Tab acts as a load ramp which guides wire loop to a locked position when installing. Made of low carbon steel, zinc plated. Wire loop of hard drawn MB spring wire.
